

Master students co-supervised by Dr Luc Roscelin Tédonzong, during their academic internship at the Great Ape Project in Cameroon

- 1) **Carine Nathalie Evouna Alima:** co-supervisor to Nathalie as she completed her Master of engineering thesis at the University of Dschang, Cameroon: *Distribution of fruiting plant genus consumed by Western lowland gorillas (Gorilla gorilla gorilla Savage et Wyman, 1847) in their entire range. (2018).*
- 2) **Daniel Ulrich Soh Dzo:** co-supervisor to Daniel as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Ethno-botanical inventory of medicinal plants at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2017).*
- 3) **Christian Nguenga Nongni:** co-supervisor to Christian as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Evaluating extinction risk associated to the utilization of plants by local people: the case of the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2017).* Christian is now working as Biomonitoring Assistant at the Zoological Society of London (ZSL) in Cameroon.
- 4) **Germain Chuissi Kamen:** co-supervisor to Germain as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Evaluating the management efficiency of protected areas of Cameroon in maintaining the forest cover: the case of the Dja Biosphere Reserve. (2017).* Germain is now working as Biomonitoring consultant at Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) in Cameroon.
- 5) **Rosalie Noëlle Tessa Medong:** co-supervisor to Rosalie as she completed her Master of engineering thesis at the University of Dschang, Cameroon: *Factors influencing the spatial distribution of deforestation inside and around protected areas: the case of the Dja Biosphere Reserve, East, Cameroon. (2017).* With this study, Rosalie has completed a Master of Science and is now doing her PhD studies at the same University in collaboration with the Cameroon Wildlife Conservation Society.
- 6) **André Patrick Ndzengue Ateba:** co-supervisor to Patrick as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Fruit consumption by Western lowland gorillas and Central chimpanzees at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon: Preference, overlap and implications for conservation. (2016).* Patrick is now working for the consortium for forest exploiters of Cameroon.
- 7) **Bienvenu Maxwell Ndjū'u Mfula:** co-supervisor to Maxwell as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Botanical description of great ape nesting sites (Gorilla gorilla gorilla and Pan troglodytes troglodytes) at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2016).* After this study, he is now working at the National Assembly of Cameroon as Forestry and Wildlife Specialist.
- 8) **Ada Myriane Keuko Patipe:** co-supervisor to Ada Myriane again as she completed her Master of Science thesis at the University of Dschang, Cameroon: *Contribution of lianas to the biological diversity and carbon stock at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2016).* After this study, she is now working as Biomonitoring and data management Assistant at the World Wildlife Fund in Cameroon.

- 9) **Giscard Njotah**: co-supervisor to Giscard as he completed his Master of engineering thesis at the University of Dschang, Cameroon: *Characterization of habitat based on plant utilization par Western lowland Gorillas (Gorilla gorilla gorilla) at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2015)*. After his study, he worked as a forestry teacher in a Forestry School, and he is now doing a Master at University of Liège in Belgium.
- 10) **Sandra Tewamba Makengveu**: co-supervisor to Sandra as she completed her Master of Science thesis at the University of Dschang, Cameroon: *Contribution of large mammals to the natural regeneration of a commercial timber species (Chrysophyllum lacourtianum) at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2015)*. After her study, she got certified as Environmental Manager and is now working in a consulting service for environmental management.
- 11) **Ada Myriane Keuko Patipe**: co-supervisor to Ada Myriane as she completed her Master of engineering thesis at the University of Dschang, Cameroon: *Influence of human activities and research on the behaviour and distribution of Western lowland gorillas (Gorilla gorilla gorilla) at the Northern periphery of the Dja Biosphere Reserve, East, Cameroon. (2014)*. With this study, she laid the foundation for her career starting as Research Assistant at the Great Ape Project in Cameroon.
